ENGINEER'S STATEMENT: I attest that: The design specifications for the proposed action were prepared by myself as a qualified engineer under s. 88.21(5), Stats. The design specifications comply with applicable standards under ATPC 48, Subchapter IV, District Maps, Drains and Corridors and Subchapter V, Construction Projects and Drainage Alterations; Department Approval. As project engineer, in my judgement, the proposed action as designed will be effective in achieving the county drainage board's objectives.
